

India COVID Response Fund 2

a giving collective for all of us to come together and support fellow Indians

what are we hearing?

Manish Sisodia
@msisodia

Delhi Govt's makeshift Covid Hospital at Commonwealth Village, Near Akshardham, is now operational with 436 beds.

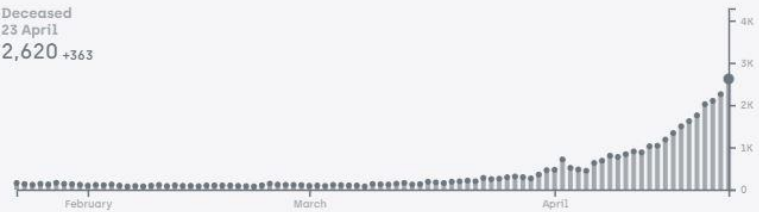

This facility is open to all and free of cost. It's a joint initiative of Delhi Government and 'Doctors for You' .

COVID-19: Defence Ministry to airlift 23 oxygen plants from Germany

The oxygen will be used at the COVID-19 hospitals being run by Armed Forces Medical Service (AFMS) across the country.

BusinessToday.In | April 23, 2021 | Updated 18:13 IST

Amid spurting COVID-19 cases, Delhi witnesses surge in demand for oximeters, oxygen concentrators

Covid-19: At the current pace, India will need another 13 months to vaccinate 60% of the population

The central government has fast-tracked emergency approvals for foreign-produced vaccines.

NEW DELHI: The number of active covid-19 cases in India during the second wave is expected to peak in May. The daily infection count is expected to exceed 3.5 lakh cases, according to a mathematical model developed by a team of scientists from Indian Institute of Technology (IIT) Kanpur.

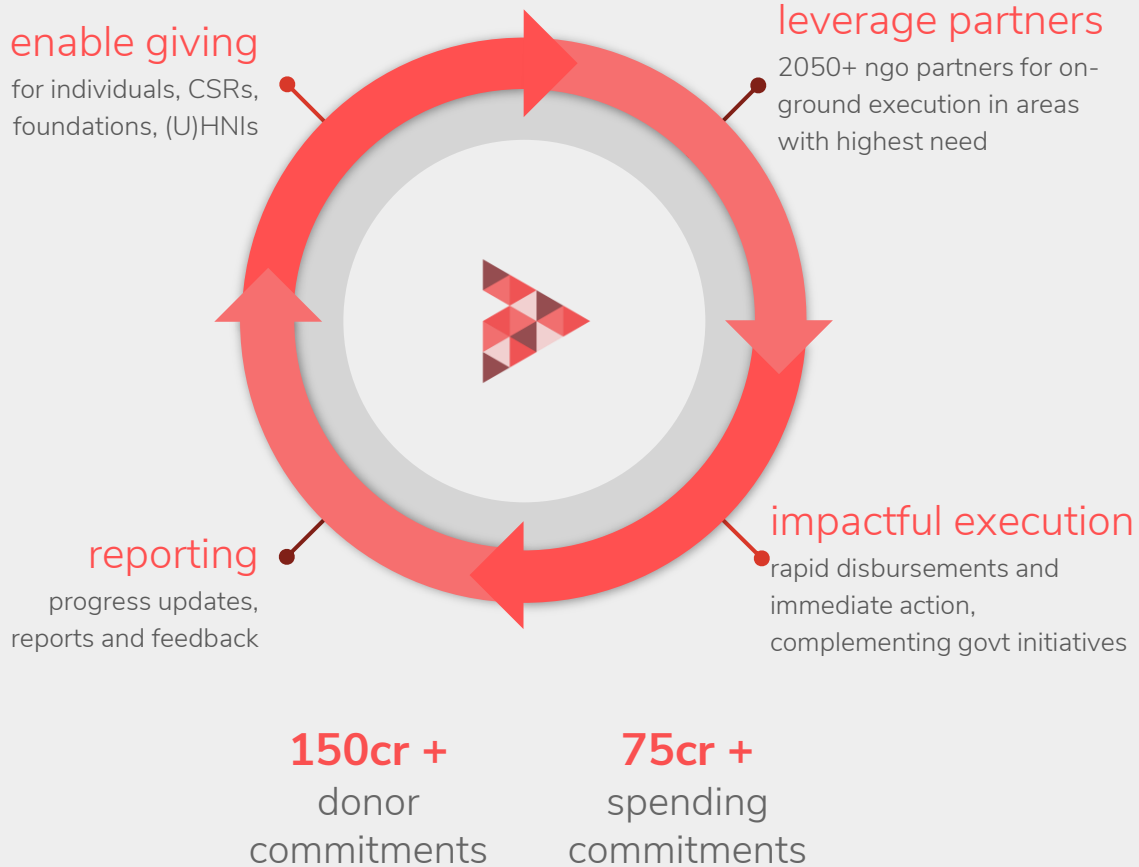

India Reports Over 2,000 COVID-19 Deaths in Single Day

India COVID Response Fund - 2

: a giving collective for **individuals and organisations** to come together and fund COVID-19 response work against the surge

: support response work, **backed by data, aligned with govt, recommended by experts**

: delivered by **trustworthy non-profits, govt agencies and partners** across the country

Intervention (direct + government + hospitals + NGOs)

1. Physical Infrastructure

- Helping the state **governments/private hospitals** set up oxygen generation plants in the hospital premises.
- Helping in setting up additional covid care facilities with oxygen beds to cater to the enormous rise and need for critical care.
- Helping the hospitals procure ventilators, oxygen concentrators, oxygen cylinders and making these available at the facilities.

2. Medical Equipments

3. Vaccination & Testing Support

- Vaccination & Testing drives in partnership with corporates for the urban and the rural population across the country

4. Cash Relief for the Family of the deceased

- Helping the families of the deceased with direct cash relief.

5. Protective & Preventive Gears

- Helping the hospitals and covid care centers with PPEs, N95 masks, gloves and sanitation supplies for covid warriors

A. Physical Infrastructure

covid care centres

location: mumbai, bangalore, delhi, chhattisgarh

requirement:

- trained staff: doctors, nursing staff and admin
- **oxygen cylinders**
- **oxygen concentrators**
- beds
- facility management

potential impact (in 3 months):

- improved quality of care to all confirmed COVID-19 patients admitted to the hospital
- reduce morbidity & mortality of COVID-19 / non-COVID19 patients

oxygen generation plants

location: mumbai, bangalore, delhi, patna

capacity (litres/min)	cost (in cr.)	serving capacity (patients/day)
1000	2.5	130
180	0.9	30
150	0.7	20

: deployment timeline - **2 weeks**

: life span - **20 years**

: to be set up in hospital/covid facility compounds

B. Medical Equipments

medical beds

- Current price : Normal beds : **INR 10k+GST** and ICU beds/fowler beds : **INR 20k+GST**

oxygen concentrators

- Current price : **INR 45k+GST** (Capacity 5LPM) and **INR 76K+GST** (Capacity 10LPM)
- Suitable for Oxygen range from 85-92. Below 85, HFNCs, Bibaps or ventilators are recommended.
- 1 person needs to be a concentrator for 5-7 days.
- **Estimated lead time is 3-4 weeks**

oxygen cylinders

- Come in 2 capacities : B-type 1500L : **INR 15k+GST** and D-type 6000L : **INR 25k+GST**
- B-type will work for 24hrs in low flow situations and 12 hrs for high flow situations.
- 1 person needs 5-7 days of oxygen support.
- **Estimated lead time is 3-4 weeks.**

refilling oxygen

- Current price : B-type **INR 800/refill** and D-type **INR 2500/refill.**
- Constraint : Oxygen supply is a huge challenge right now as manufacturing is in certain states and transporting oxygen from 1-state to another requires specific vehicles which are not available

bipaps

- Non-invasive ventilation an alternative to the ventilators.
- Current price : **INR 50-60k+GST.**

ventilators

- Current price **INR 5L+GST.**
- **Estimated lead time is 10-15 days**

C. Vaccination & Testing Support

locations : Pan India

cost per center/month : INR 3.4L/month

partners :

- Doctors for You
- Ekam Foundation

vaccination centers :

- Infra to be provided by the Govt./ partner.
- Facilitate Mobile Vans for both testing and vaccinations in both urban and rural locations.

D. Cash Relief for the Family of the deceased

locations : Pan India

- Helping the family of the deceased with direct cash relief of INR 6K for a family of upto 5 members.

estimated cost ~ INR 30K/per family

E. Protective & Preventive Gears

locations : Pan India

- Helping the hospitals to procure protective gears such as PPEs, N95 masks, gloves and sanitation supplies for the covid warriors (doctors, nurses, paramedics and other healthcare warriors).
